To Whom It May Concern,

Re: [REDACTED]

I had the pleasure of seeing [REDACTED] for a full eye examination today.

Please find my results below:

- Bilateral astigmatism: stable, advised to continue with current glasses
- Photophobia: previously noted at last eye exam, now within normal limits
- Near point of convergence: previously noted as receded at last eye exam, now within normal limits

[REDACTED] stated that she has been consulting with Lorrie Jollimore for Neuromovement therapy, which has improved her visual symptoms and symptoms in general.

Yours truly,

Dr Claire Shaw
